

Products and Services

Inventoried Plastics and Plastic Accessories:

Nationwide Plastics, Inc. inventories a wide variety of plastics and plastic accessories at all of our locations. Plastic materials are stocked in many shapes and sizes including sheet, tube, rod and film. Some materials may require additional charges for cutting and/or special packaging.

Machining and Sawing:

Nationwide Plastics, Inc. utilizes a variety of CNC machinery to fabricate custom parts per customer prints. Our list of specialized equipment include CNC saws, mills, lathes and routers as well as an array of manually operated equipment. We also offer plastic welding and fusion capabilities.

Molding, Thermoforming and Fabrication:

NPI has on-site capabilities to do thermoforming and rotational molding to customers specification. We are also able to source injection molding, compression molding, and custom extrusions. Our complete in-house welding and fabrication services are available for custom-made parts.

Chairmats:

Nationwide Plastics, Inc. inventories many standard sizes and types of chairmats for immediate delivery. NPI also inventories large quantities of "raw" chairmat materials which enables us to offer timely deliveries of custom cut to size chair mats.

Pipe, Valves, Fittings and Pumps:

Nationwide Plastics, Inc. offers many types of piping systems. We stock and distribute many well known brands of pumps and valves. Piping system materials include HDPE, PVC, ABS, Acrylic and many more. Please contact our customer service department for more information on available plastic piping systems and accessories.
